PROFILE

Flutter Developer with 2+ years of experience building scalable cross-platform mobile applications using Flutter and Dart. Experienced in designing high-performance mobile UI, integrating REST APIs, and implementing backend services using Node.js. Skilled in working with Firebase, Supabase, and MySQL databases for real-time data management and backend integration. Strong understanding of mobile app architecture, performance optimisation, and state management. Experienced in Agile environments and comfortable collaborating with designers, backend developers, and QA teams.

PROFESSIONAL EXPERIENCE

Programmer Analyst

Cognizant Technology Solutions

06/2023 – Present
Bangalore, India

Flutter Development

- Developed and maintained cross-platform mobile applications using Flutter and Dart for Android and iOS.
- Designed responsive and scalable UI components following modern mobile design principles.
- Integrated REST APIs and backend services using Node.js to support dynamic application features.
- Implemented backend integrations using Firebase(Authentication, Firestore, Cloud Functions) and Supabase.
- Implemented state management solutions and modular architecture to improve code maintainability.
- Worked with Git and CI/CD pipelines to ensure smooth code integration and automated deployment workflows.
- Used Postman and debugging tools for API validation and performance monitoring.

Guidewire Functional Testing

- Performed functional testing for Guidewire-based insurance systems to validate application workflows and business logic.
- Created and executed test cases for policy management.
- Collaborated with developers to identify defects and ensure quality releases.
- Documented defects and test results using Jira for defect tracking and project management.

Web Dev Intern

Deotic Cloud Solutions

04/2022 – 05/2022
Bangalore, India

- Front-end web development using HTML, CSS, and JavaScript.
- Completed HTML, CSS, and JavaScript courses on freecodecamp.
- Developed a personal Portfolio website showcasing my projects and progress.
- Created a Weather web app to enhance practical application. - Implemented data visualization using d3.js for European Football-19 stats.
- Proficient in version control with GIT.

EDUCATION

Bachelor of Engineering in Computer Science

Sahyadri College of Engineering & Management

08/2018 – 07/2022
Mangalore, India

SKILLS

Programming Languages: Dart, JavaScript, SQL, C

Mobile Development: Flutter, Dart, Provider, Bloc, Riverpod, State Management, Responsive UI Design, REST API Integration

Backend Development: Node.js, Firebase, Supabase, REST APIs

Testing: Functional Testing (Guidewire), API Testing, Debugging

Databases: Firebase Firestore, Supabase, PostgreSQL, SQL

Tools & Platforms: Git, Postman, Jira, Bitbucket, Visual Studio Code, Figma, Android Studio

Development Practices: Agile Methodology, CI/CD, Code Reviews, Documentation

PROJECTS

Cleaning Service Provider App (Flutter + Supabase)

Across-platform app for customers to book cleaning services, featuring OTP and Google Sign-In via Supabase Auth. Designed responsive UIs using Flutter's layout system and implemented booking logic with state management. Built features such as coupon validation, bill summary automation, and admin dashboard system.

Technologies used: Flutter, Dart, Supabase, PostgreSQL, Google Maps, Riverpod

Blinkit Clone App

Built a feature-rich grocery delivery application inspired by Blinkit using Flutter, implementing product listings, category-based navigation, cart management, search functionality, and responsive UI components. Applied clean code practices, reusable widget architecture, and state management principles to create a scalable and maintainable mobile application with an intuitive user experience.

Technologies used: Flutter, Dart

Imposter Picker

Developed a Flutter based interactive game where users can add multiple players and randomly eliminate one through an *Among Us-inspired animated ejection*. Leveraged third-party Flutter packages to implement smooth animations and responsive UI.

Technologies used: Flutter, Dart

Flash Chat App

Developed a real-time messaging application, enabling users to send and receive messages instantly with seamless UI updates. Integrated backend services for user authentication and cloud-based data storage using Firebase, ensuring secure communication and persistent chat history.

Technologies used: Flutter, Dart, Firebase Authentication, Cloud Firestore

CERTIFICATES

The Complete Flutter Development Bootcamp with Dart by Dr. Angela Yu
Skills: Dart, Flutter, Firebase, REST APIs

Complete SQL Mastery by Udemy
Skills: SQL, Database management system

C course by Sololearn
Skills: C programming
